AGCW - SEATTLE

Dear Don:

Attached is a copy of the latest engineering report on the site drainage plan at our Seattle plant.

We are not making any provisions for your process water overflow that will go to Metro.

Earlier you expressed interest in the process water from our truck wash. At this time, we are planning on running this water to metro. If you want to use the water to replace some of your make up water, please contact Nate Fernow at an early date so we can proceed with the engineering on this project.

If you have any questions or comments on this report please contact me, or if I am unavailable contact Nate Fernow.

Very truly yours,

ASH GROVE CEMENT WEST, INC.

Richard E. Cooke
Vice President - Operations
